Tinkerbell

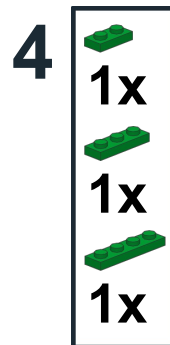

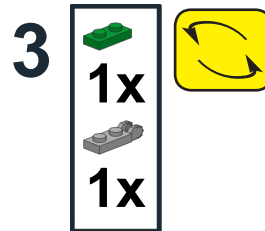

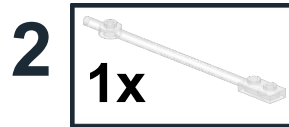

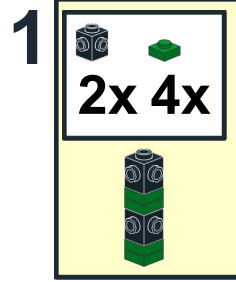

Design by Miro Dudas

To celebrate the magical theme of this issue, we decided to create a life-size Tinker Bell. The core design repurposes my previous Surfing Girls creation from a few years ago. The arms and legs were already positioned perfectly so adjusting them for Tink was a breeze. All I had to do was make her fly.

I gave her a pedestal and a clear support to anchor her in mid-air. (Building tip: use an older clear support rod since they are more rigid. The newer ones are made with a newer plastic that has a bit more bend and can't quite support the fairy.) The model wobbles slightly when moved so it almost looks like she is hovering all on her own.

The wings were a challenge but I stuck to a simple and sturdy design to let the colors shine and sparkle. And finally, you can easily swap all the tan pieces for reddish brown to make any version of Tinker Bell you wish. So grab some pixie dust and start building on your way to Never Never Land!
