Pirate Ship Ride

Design and Instructions
by the BrickNerd Team

Going to an amusement park is always one of the most thrilling adventures as a kid. The fantastic sights, the smells of popcorn and cotton candy in the air, the sounds of screaming thrill-seekers.

One of the more memorable and iconic rides from many amusement parks is the pirate ship ride that rocks back and forth like a ship on the waves.

The BrickNerd team has designed a small version of this rocking ride, complete with a mini ticket stand, a ship that swings, and a ride logo!

Don't miss the new 2L bars being used to help hang the ship or the well-placed grille tiles used to make tiny port-holes. You can even change the printed tile to theme the pirate ship ride to whatever you want. How fun!

This was a fun little model to design – we hope you'll enjoy building it just as much as we did designing it!
